This increase is to recover changes in the costs for several components of the Societal Benefits Charge and the Non-utility Generation Charge. PSE&G derives no profit from these charges. The bill impact of this change for a typical residential customer receiving PSE&G's BGS supply service, and using 7,360 kilowatthours per year, will be an annual increase of \$19.20 or approximately 1.4%. More information about these changes will be provided in an upcoming bill insert. Tariff information may also be found by visiting www.pseg.com.

This bill reflects changes in your gas delivery charges effective July 9, 2010 as the result of the BPU's approval of a change in one of the components of the Societal Benefits Charge and approval of the Gas portion of PSE&G's Base Rate Case. The impact of these changes varies by rate schedule and customer usage and whether you receive your commodity supply service from a Third Party Supplier or you receive PSE&G's Basic Gas Supply Service (BGSS).
